Natural wood protector for teak on boats

**Sioo**  
WOOD  
PROTECTION

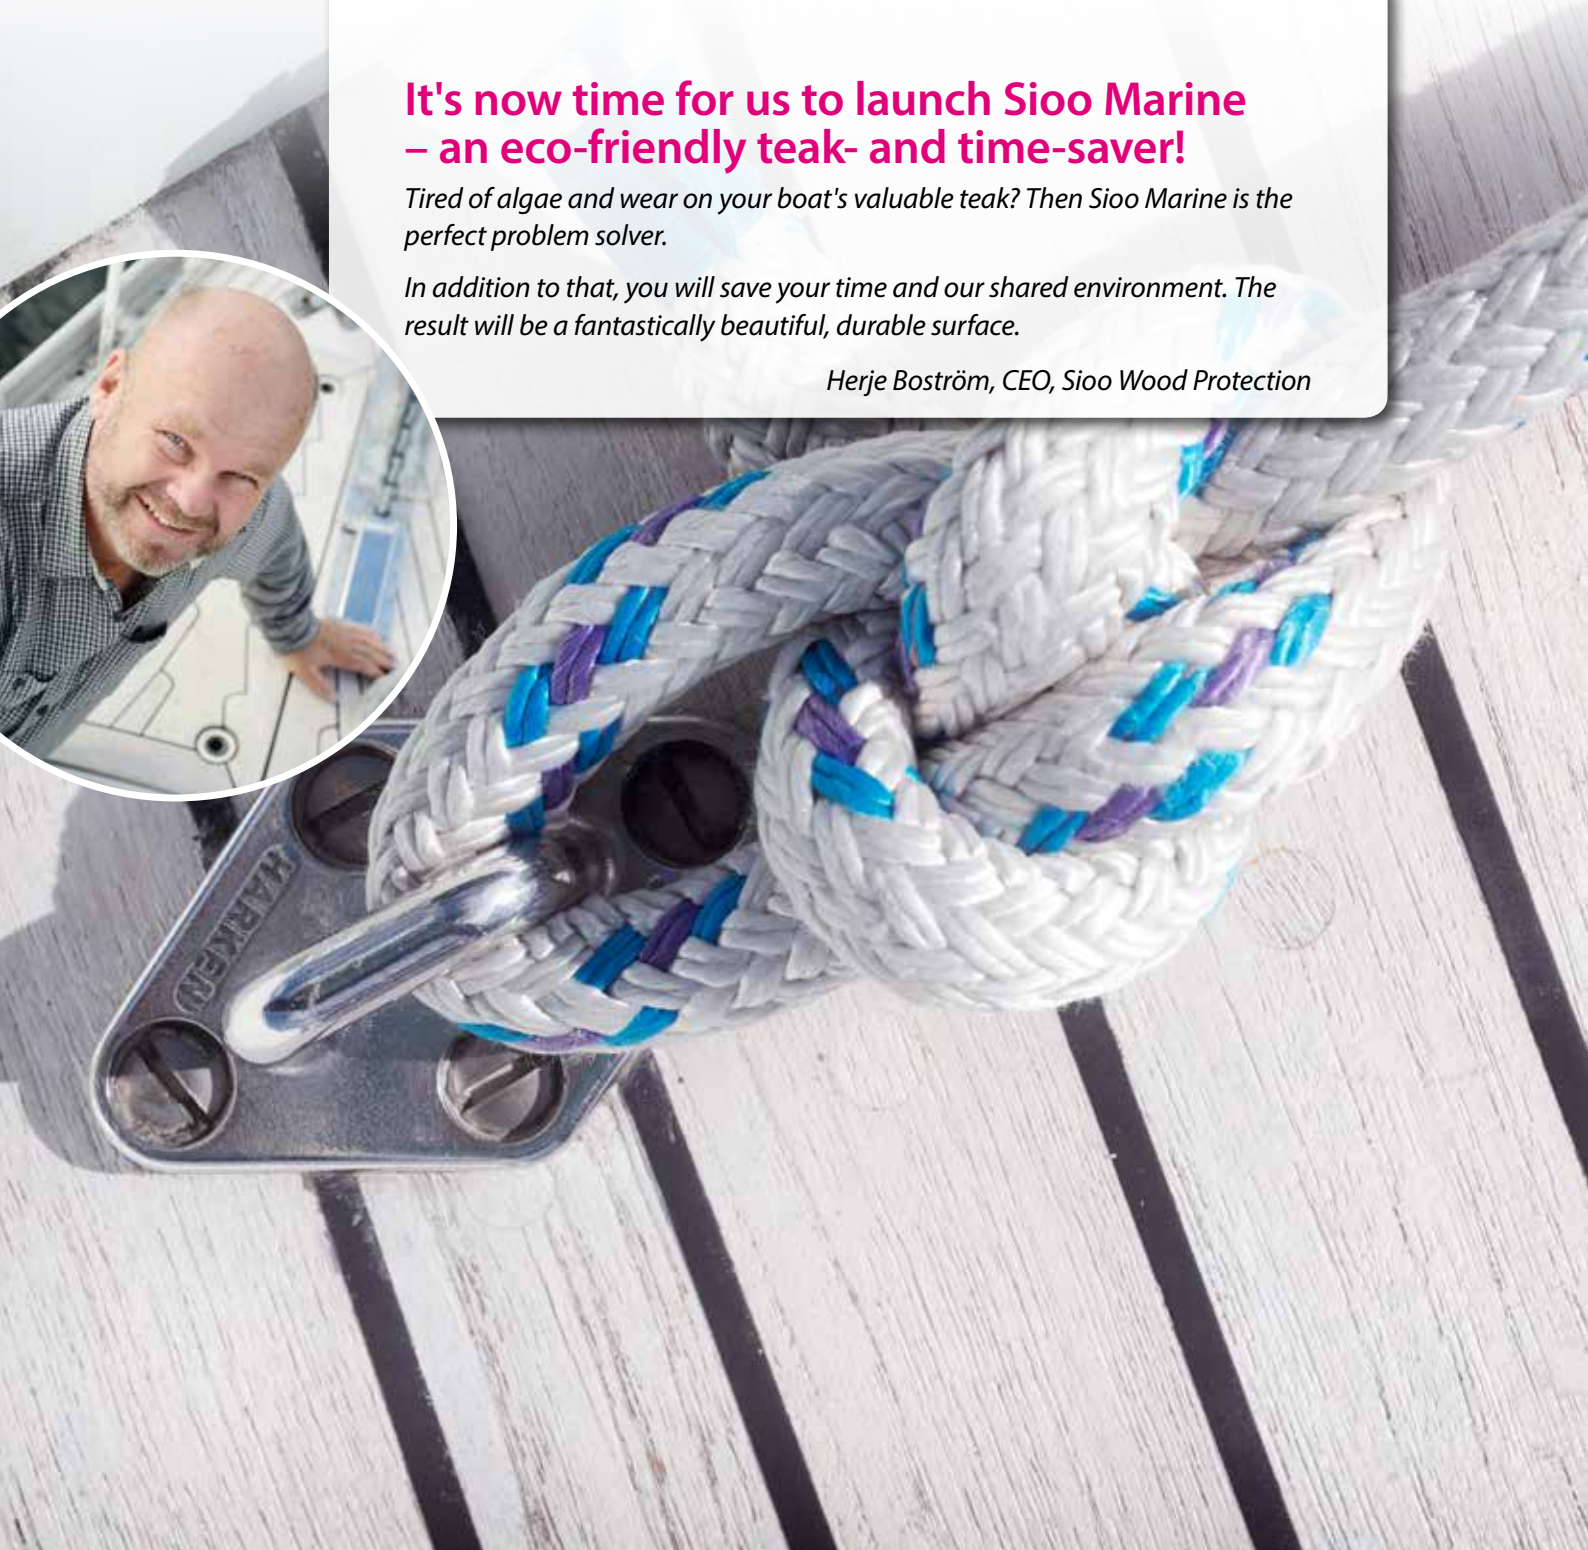

*Safe, Natural, Sustainable*

## It's now time for us to launch Sioo Marine – an eco-friendly teak- and time-saver!

*Tired of algae and wear on your boat's valuable teak? Then Sioo Marine is the perfect problem solver.*

*In addition to that, you will save your time and our shared environment. The result will be a fantastically beautiful, durable surface.*

*Herje Boström, CEO, Sioo Wood Protection*

## Three simple steps for longer durability

Sioo Marine helps to prevent any degradation of the teak while the eco-friendly silicon products preserve the surface. The wood fibres are impregnated and strengthened by elements in the Sioo product. Beneficial elements are prevented from leaching out of the wood and the surface is improved, leading to long durability. Even old teak decks can be saved and given new life!

### This is how easy it is

1. Clean the teak and then let it dry.
2. Brush on Sioo Marine Wood Protector twice allowing a drying period in between.
3. Finish off with Sioo Marine Surface Protector.

### Lasts for up to 8 years.

For eight years you can lean back and spend your time doing something else. At the same time, you get a deck or cockpit seating that is cool and smooth to walk and sit on. Sioo Marine binds the wood fibres together and the surface becomes resistant to soil and water. The only thing that you need do is a simple annual clean and possibly some touching-up.

## Sioo Marine makes boating a little simpler

- Suitable for both old and new teak
- Eco-friendly for people, sea and nature
- One treatment gives several years of protection
- Preventive protection against algae and black mould
- Only some simple cleaning needed each year
- Economical over a number of years
- Well tried and tested for 8 years
- Preserves the timber for longer
- Creates a cool, clean, smooth surface to walk on, sit on and touch
- Water and soil resistant
- UV-proof and UV-protective

Sioo Wood Protection AB is the Swedish company that has developed a globally unique, patented potassium-silicon wood protection product. It provides superior function and durability and is based on many years of experience and on-going research and development carried out in in Gothenburg with world leading wood scientists.

The products are made in Sweden and are sold in specialist stores and via [www.sioo.co.uk](http://www.sioo.co.uk). For more information please visit [www.sioo.co.uk](http://www.sioo.co.uk) and [www.sioo.se](http://www.sioo.se).
